

Are You Interested In Starting Your New Career In the Computer Technology Field?

Why not start your new career in Technology with Per Scholas in as little as 3 months?

Here are some frequently asked questions about the program.

What makes the Per Scholas program different from other schools in the area?

At Per Scholas you will have a deeper learning experience, in turn making you more job ready upon graduation. You will enjoy a better learning experience. You also have more credibility when interviewing for a job because our experienced instructors can be listed on your resume.

I've heard it can be very difficult to find a job in the Technology field unless you actually "know someone". Can Per Scholas help me to obtain employment upon completion of the program?

Go to school with Per Scholas and you'll have a high likelihood of achieving your Computer Technician career goal in a short period of time. Did you know that 85% of our graduates are placed in jobs within months of graduation? In addition to teaching you, we also offer as part of your program career transition coaching and job placement assistance.

There are many other schools that provide similar types of certification training in a shorter period of time. Why should I choose a training program with longer hours?

It is a known fact that most schools only train students to pass the certification exams through memorization. By offering extended hours, you will not only feel comfortable with what you have learned throughout our program(s), but you'll be properly prepared to enter the workforce with practical hands-on instruction. The uniqueness of the Per Scholas training not only gives students the skills necessary for employment as PC Technicians, but also introduces individuals to the many other facets of the Information Technology field.

My friend went to a University and got his Bachelors degree in the computer field and he still can't find a job? What guarantees will I have for finding employment by completing the training?

Legally, no university, college, or Institute can "guarantee" employment upon completion of training; however, by enrolling with Per Scholas, you will be given the skills necessary to get your foot through the door and into a field that has been tough to get into. By offering you the ability to obtain your IT certifications as part of our program, you won't have to worry about finding the additional funds to cover the costs and can potentially increase your wages and job security.
